

# Advancing Modeling of Lake Ice Thickness and Phenology in High-Latitude Regions

Homa Kheyrollah Pour

G. Attiah, K.A. Scott, C.R. Duguay

7th LAKES Workshop / 20-21-22 November / Milan  
Parameterization of Lakes in Numerical Weather Prediction and Climate Modelling 2024

# Lakes in Canada & Northwest Territories (NWT)

**~2 million Lakes in Canada**  
**>160,000 Lakes in NWT**  
**> 8% of Canadian Lakes**

# Lakes in Canada & Northwest Territories (NWT)

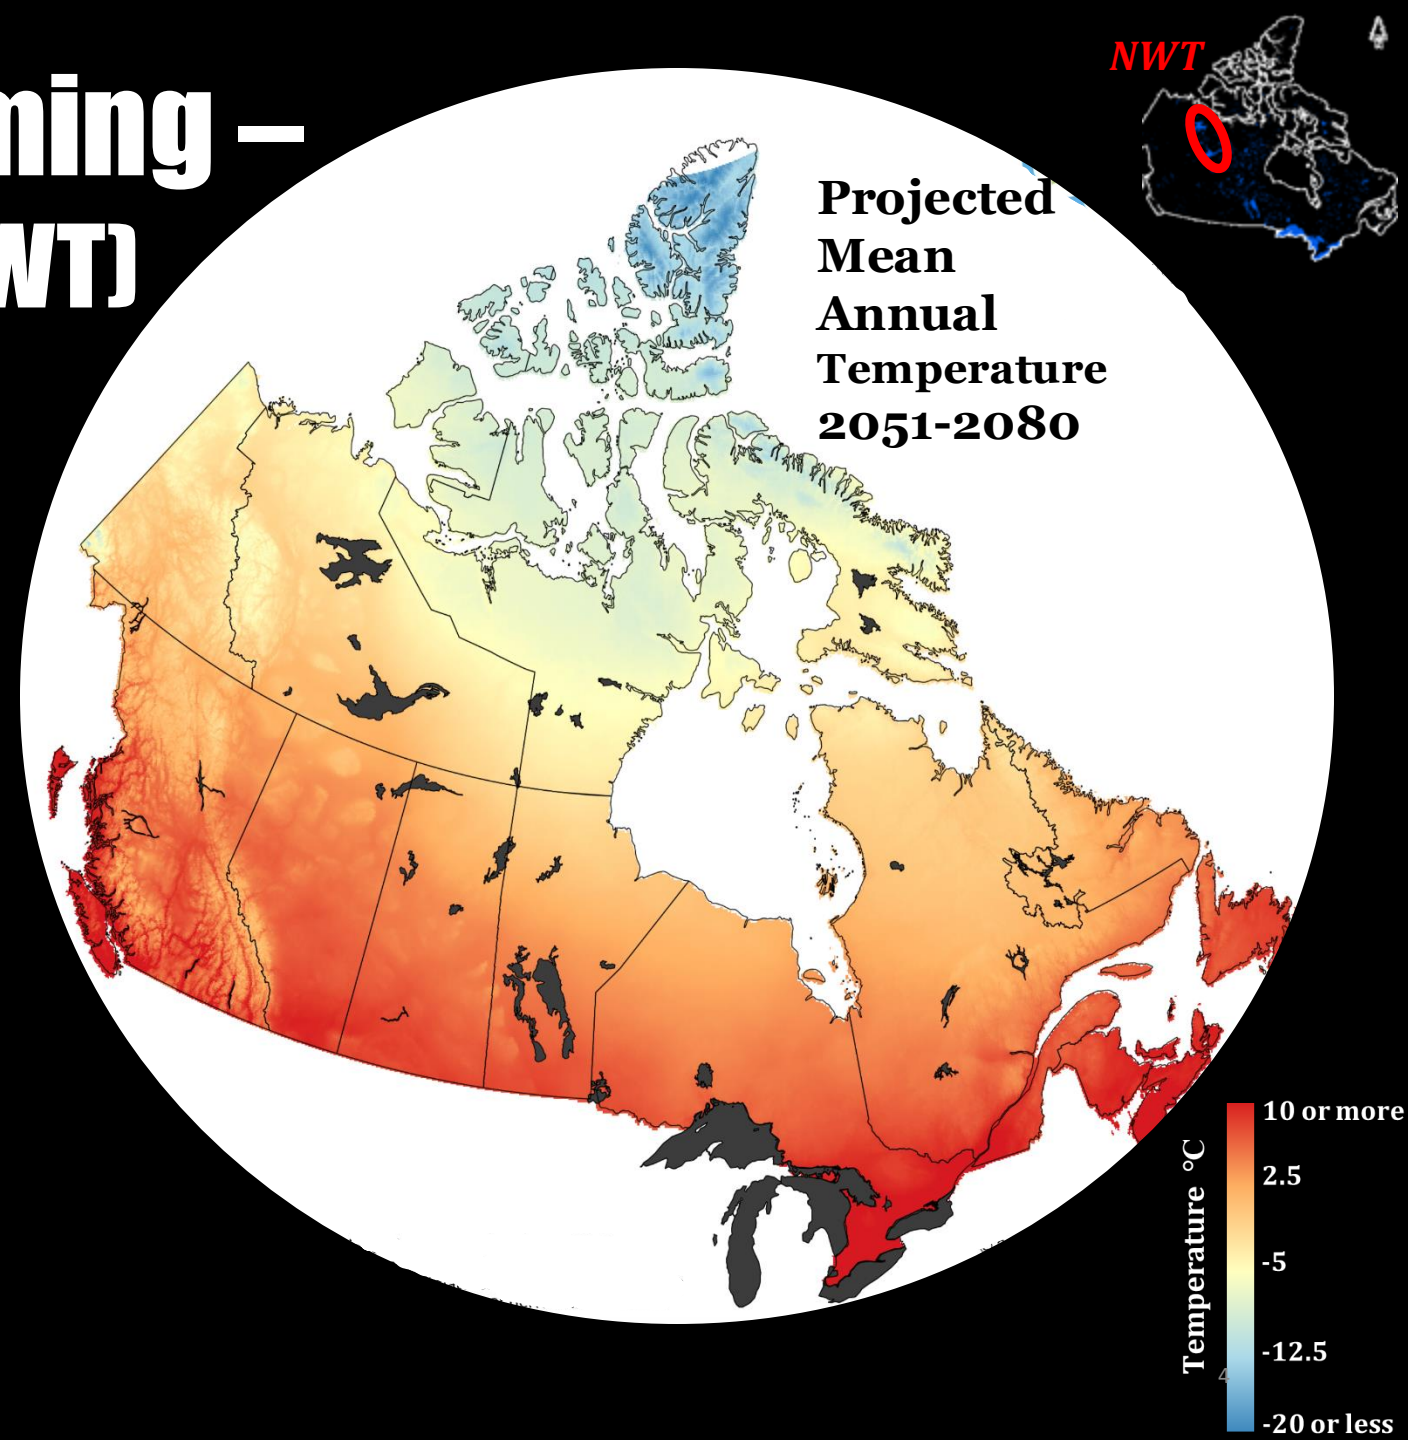

**~2 million Lakes in Canada**  
**>160,000 Lakes in NWT**  
**> 8% of Canadian Lakes**

# Winter Climate Warming – Northwest Territories (NWT)

## NWT by 2080

- Annual Mean Temperature can increase by **+5.6°C**
- **Winter** Mean Temperature can increase by **+7.8°C**
- **Winter Min** Temperature can increase by **+8.2°C**

# Winter Climate Warming – NWT

# <math>-30^{\circ}\text{C}</math> days can decrease 28 days by 2050

# <math>-30^{\circ}\text{C}</math> days can decrease 51 days by 2080

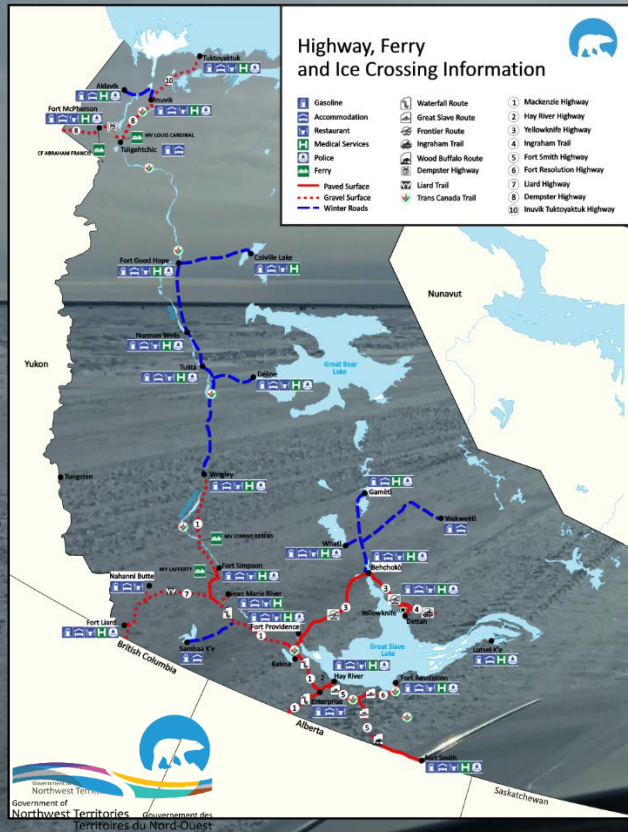

# Climate Change & Ice Roads Safety

**There is a lack of knowledge on how winter climate warming affects the variability and evolution lake ice cover.**

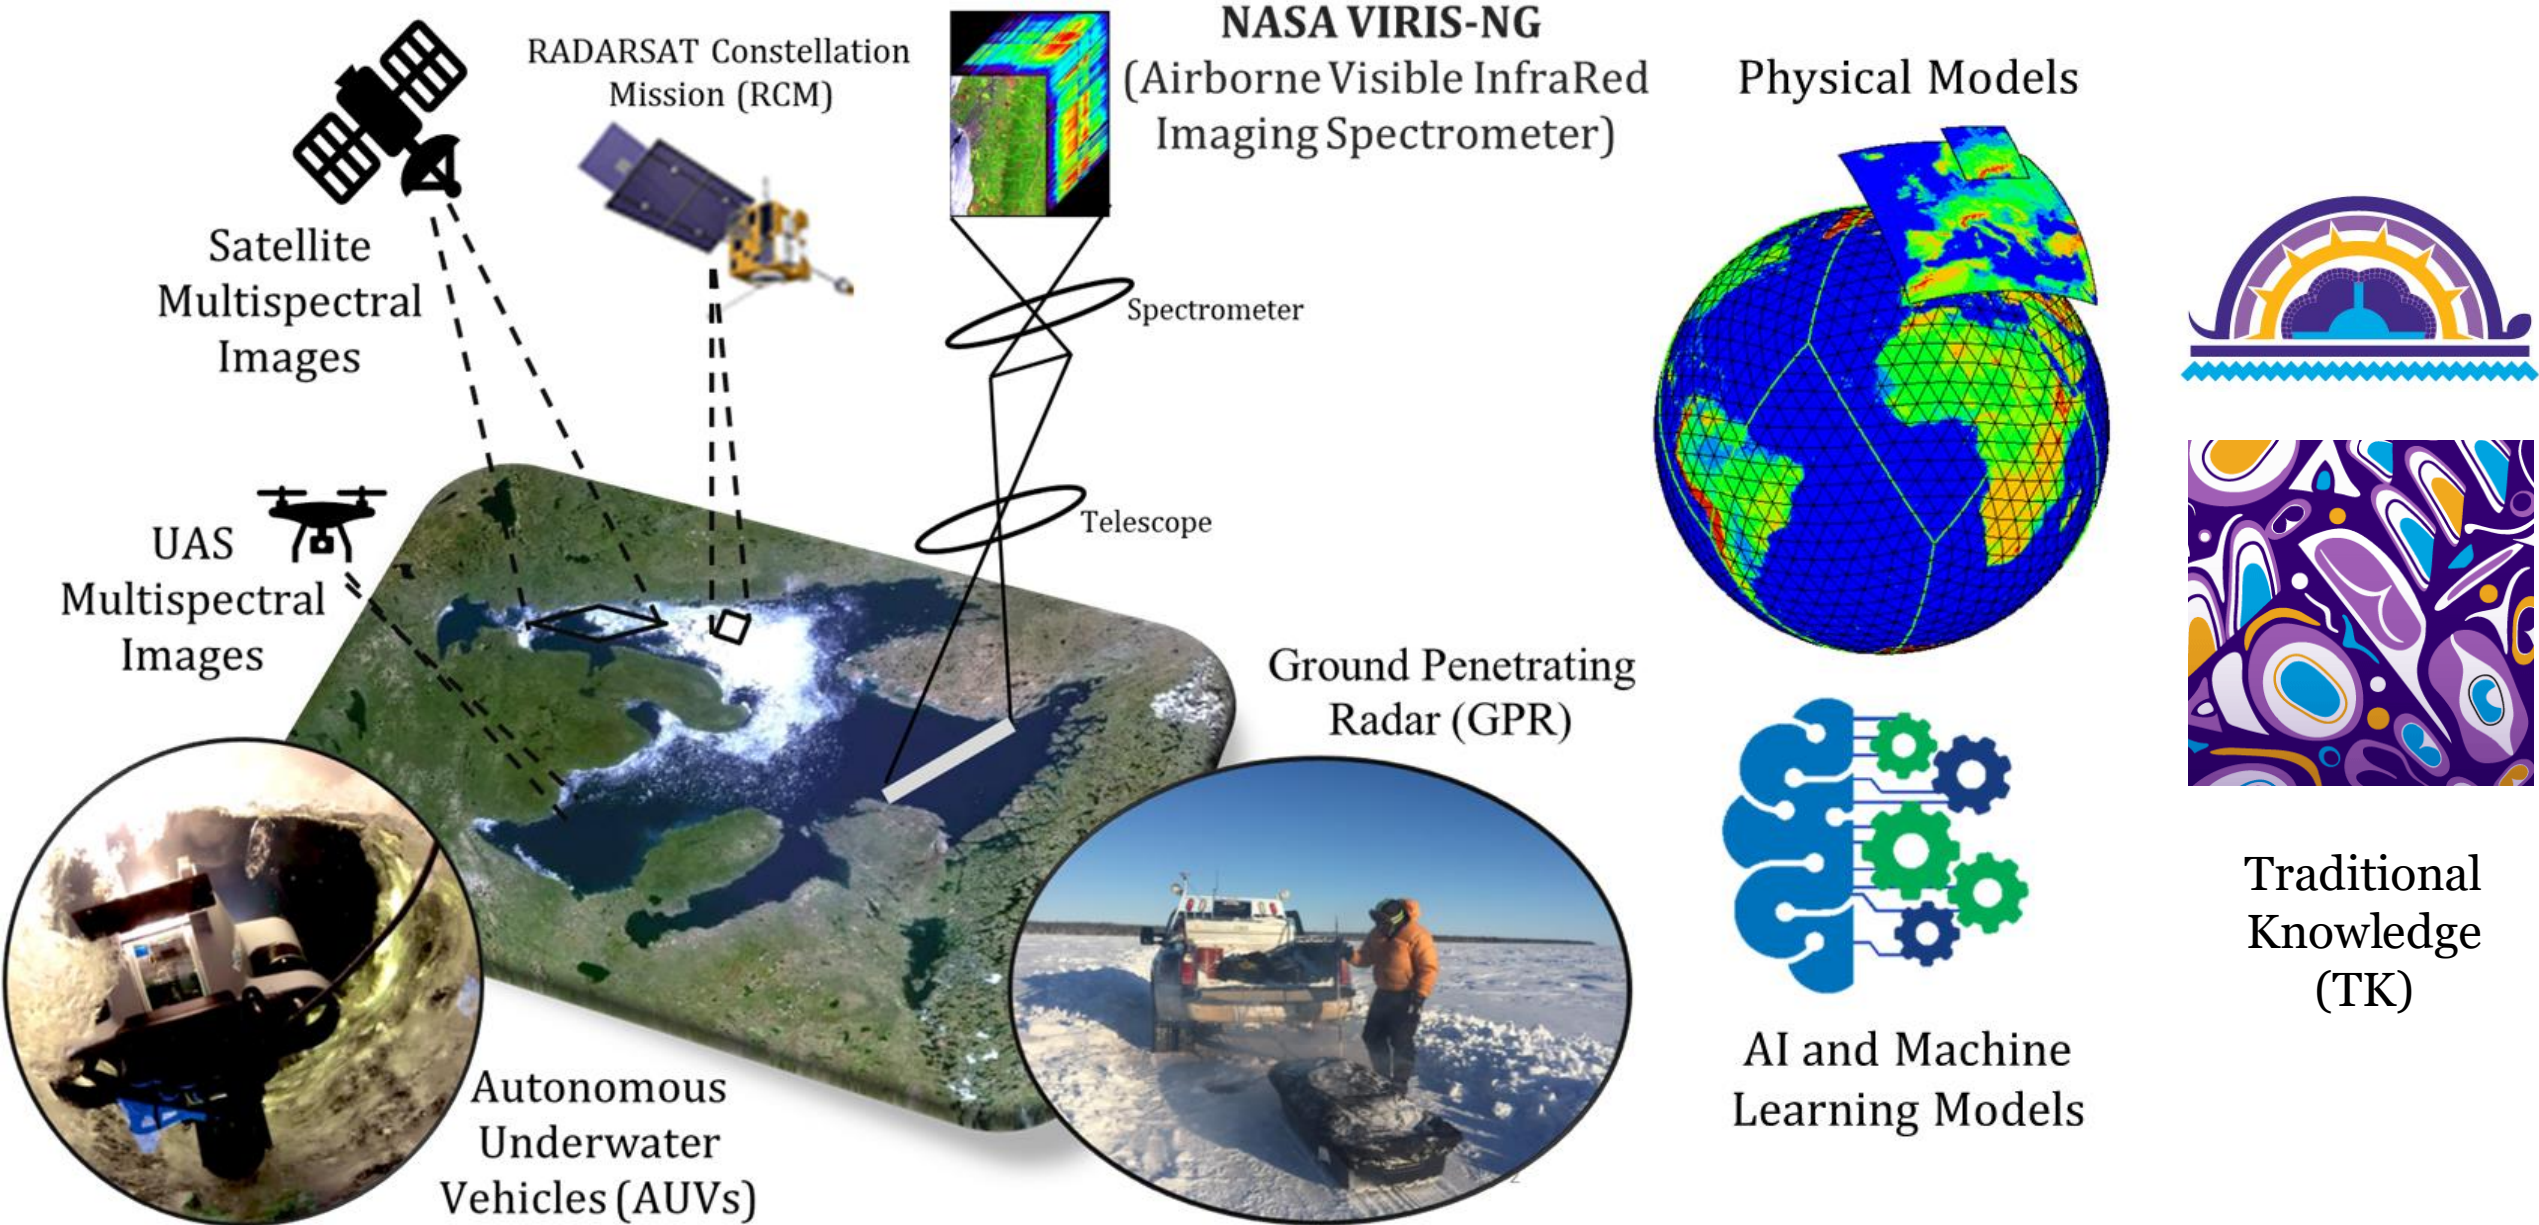

# Climate Change & Ice Roads Safety

There is a lack of knowledge on how winter climate warming affects the variability and evolution lake ice cover.

# Multi-method Approach

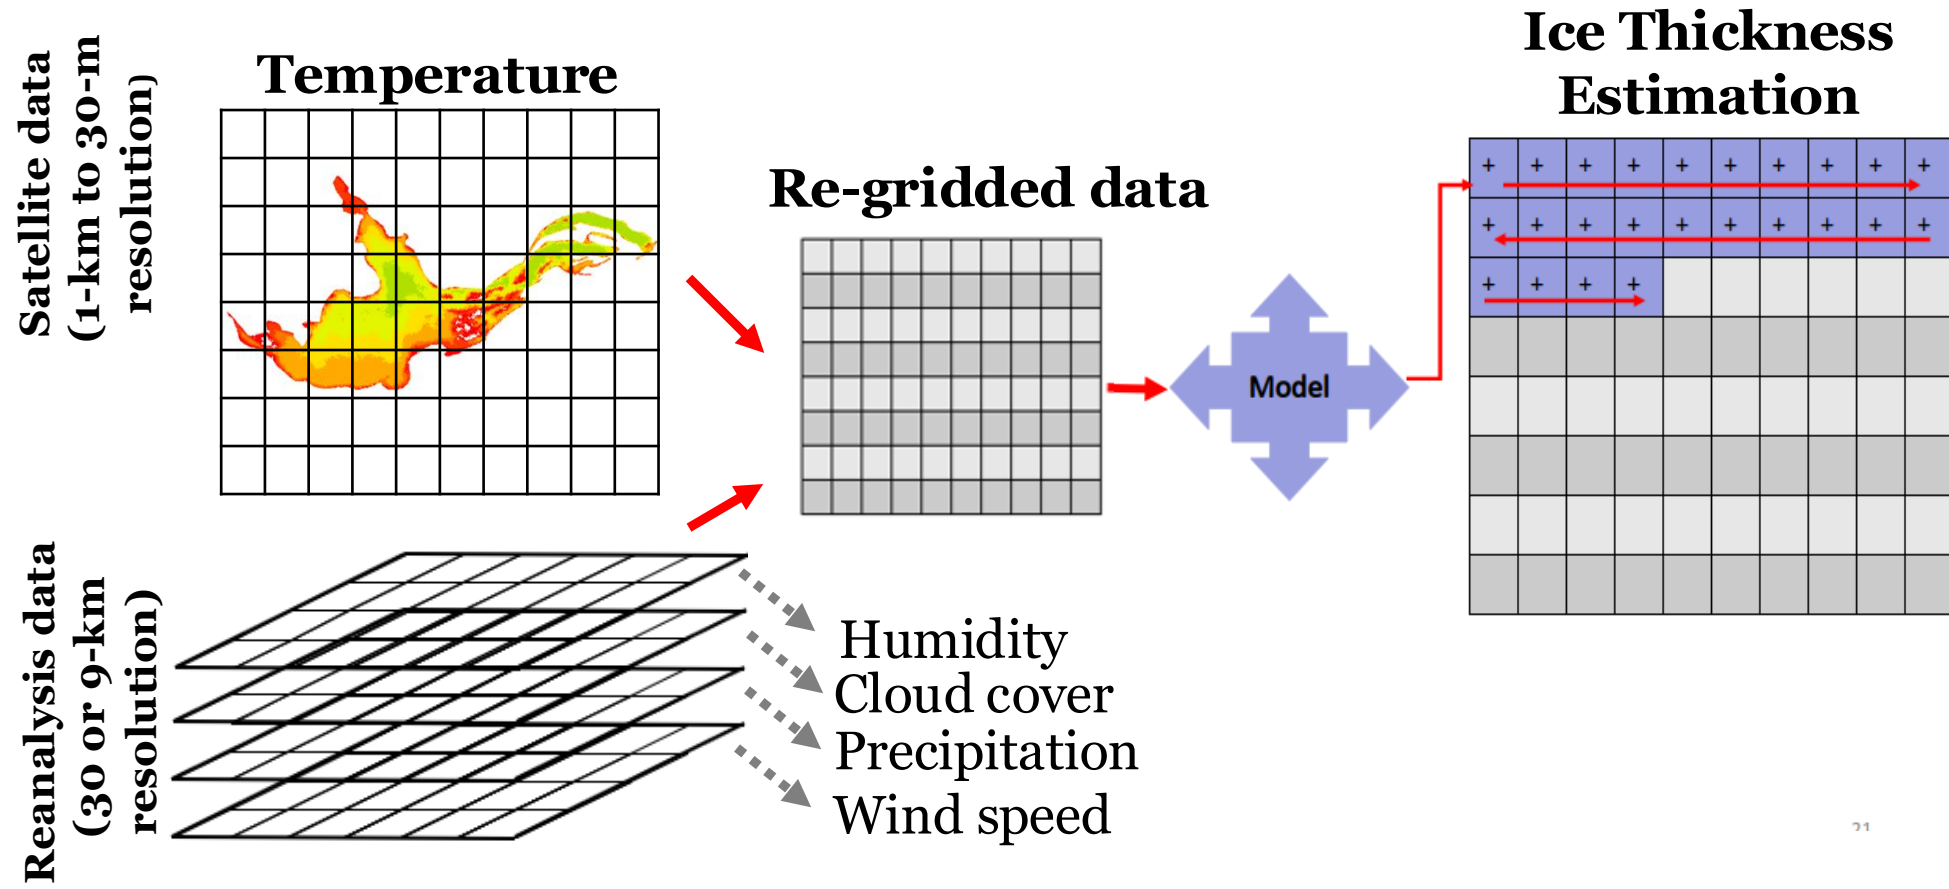

# Ice Thickness

Great Bear Lake Ice (April 2022)

# Canadian Lake Ice Model-Grid (CLIMoGrid Model)

# Lake Surface Temperature (LST)

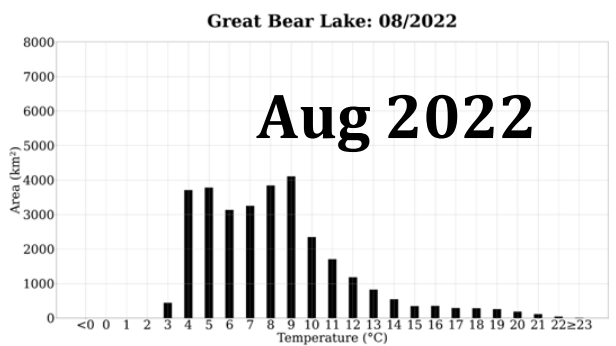

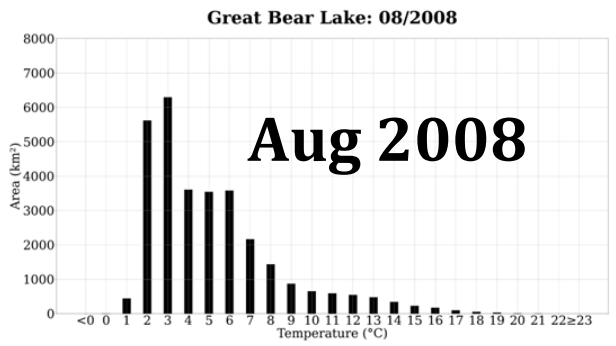

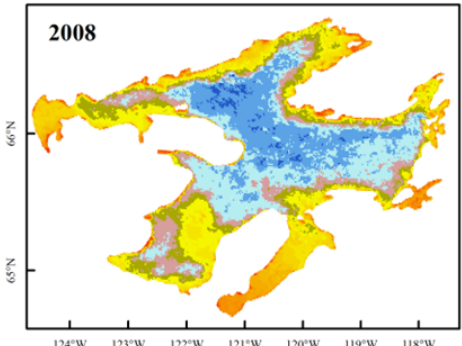

**Great Bear Lake (June 2023)**

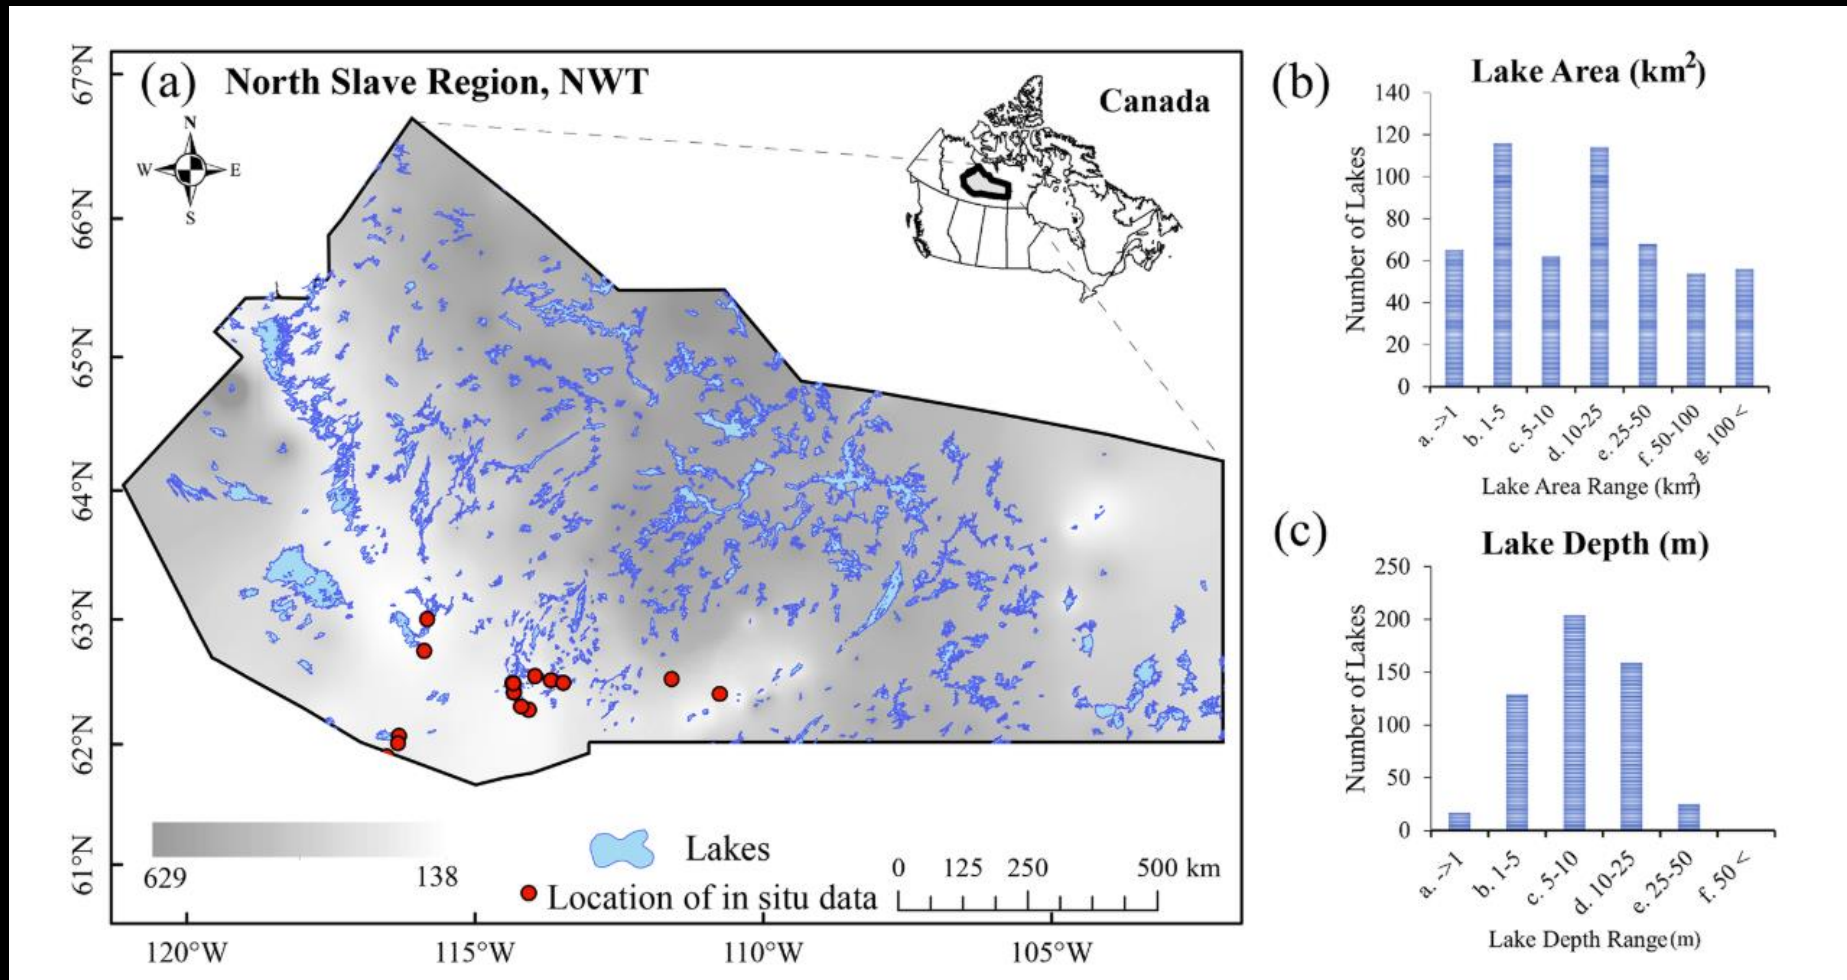

**Great Bear Lake (August 2023)**

# Satellite Derived – Monthly LST

## Great Bear & Slave Lakes

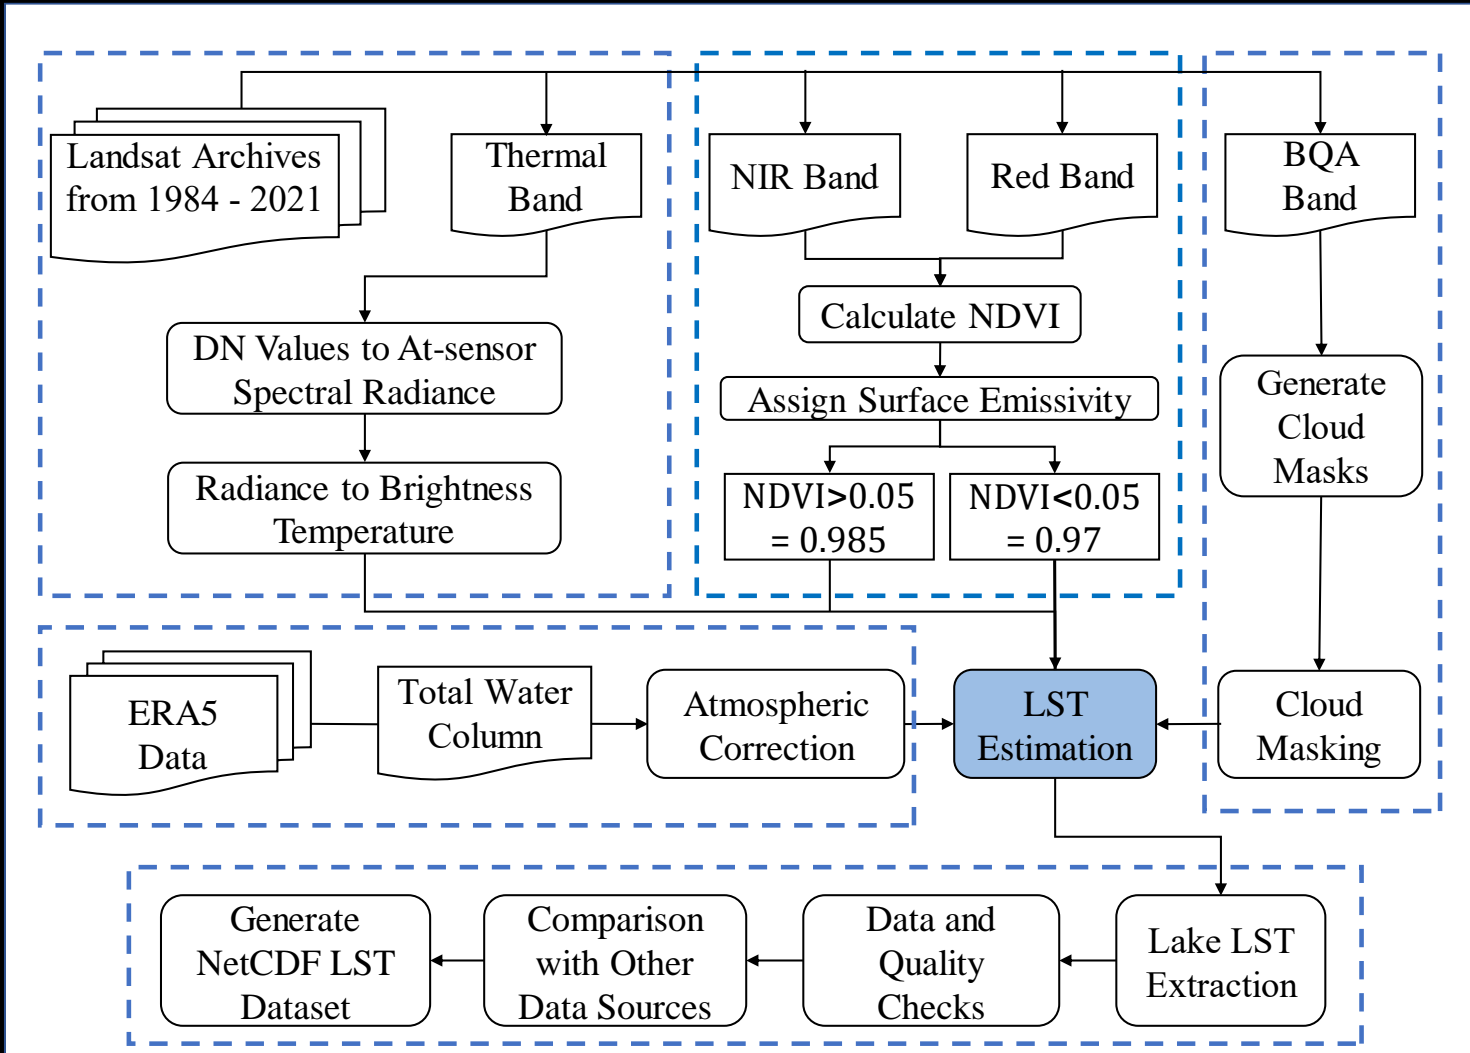

# LST Retrieval from Landsat

LST algorithm for >500 sub-Arctic lakes  
over the past four decades

# LST Retrieval from Landsat

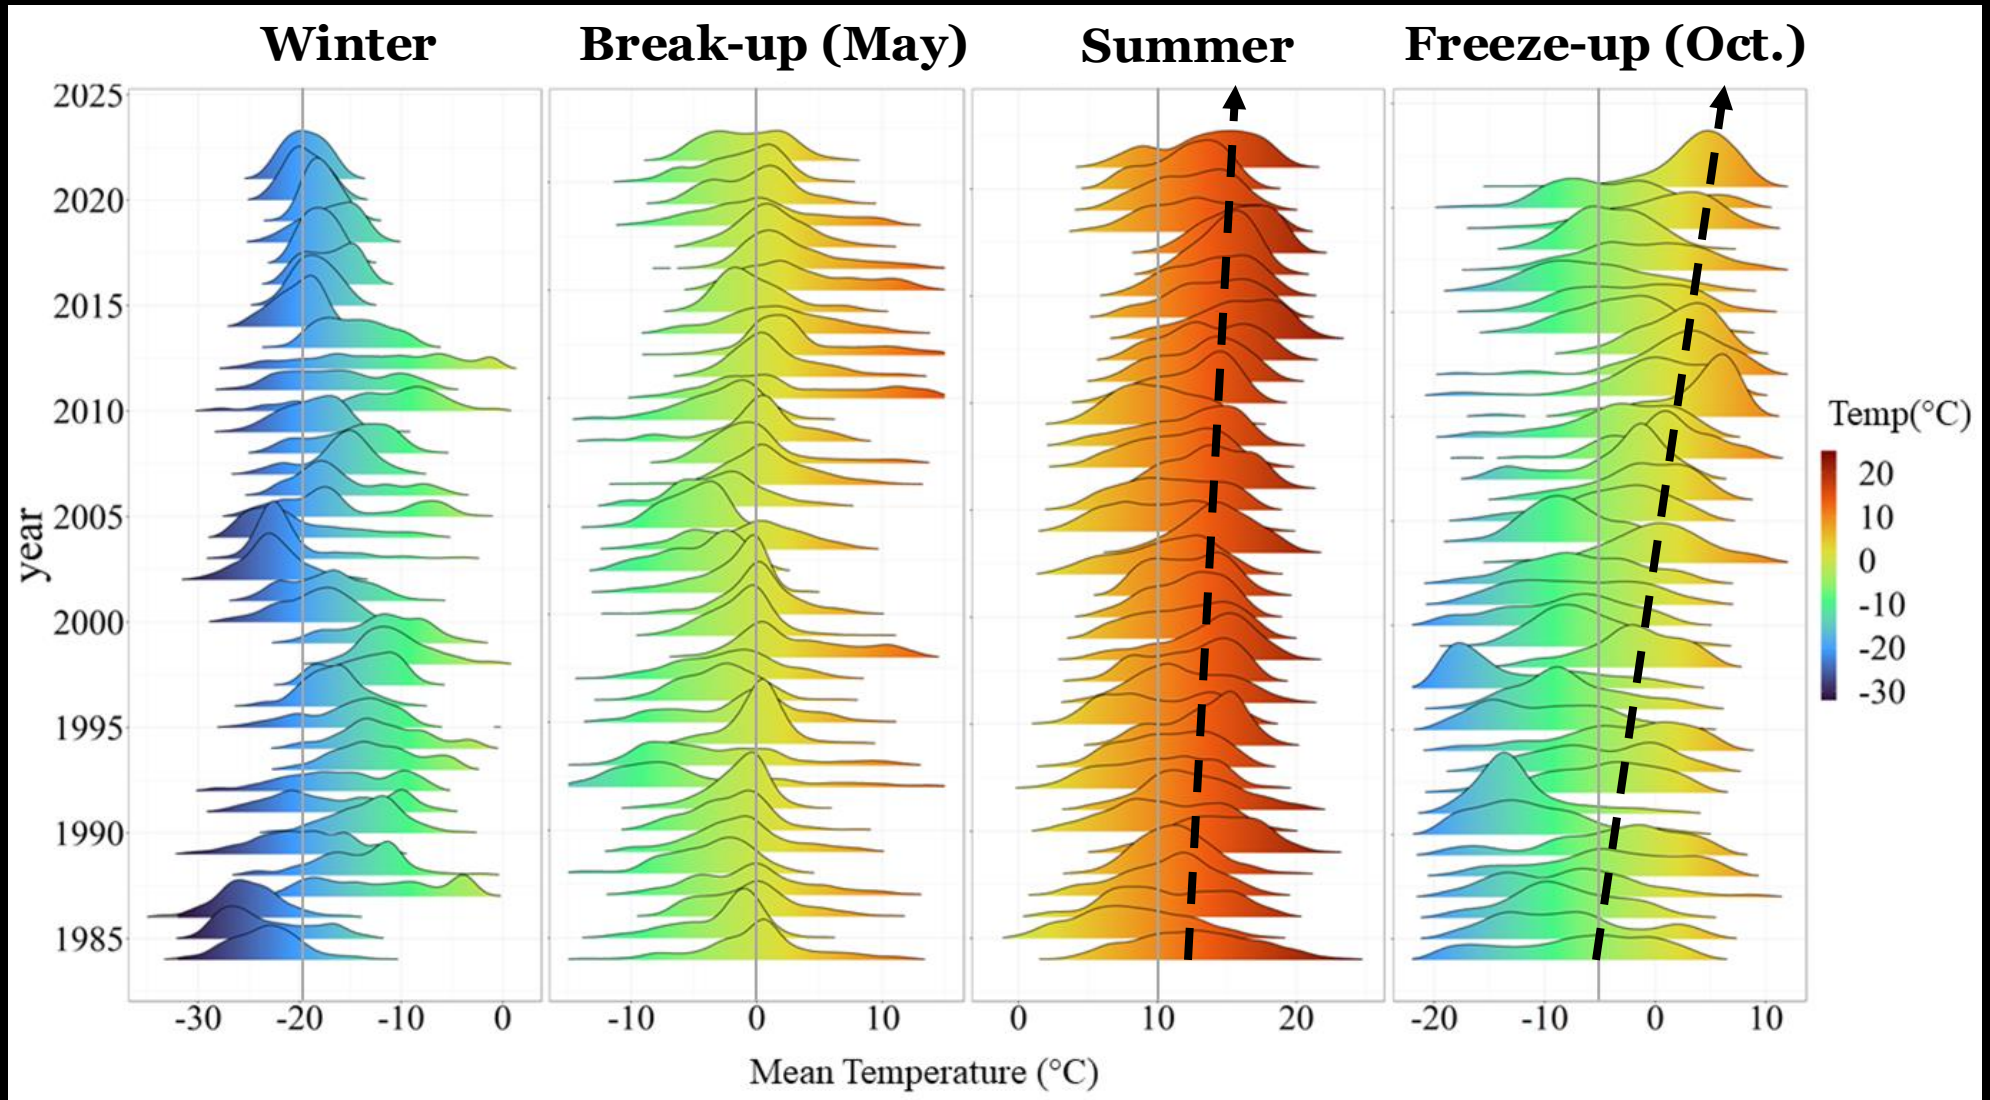

Retrieve LST from Landsat data (1984 to 2021)

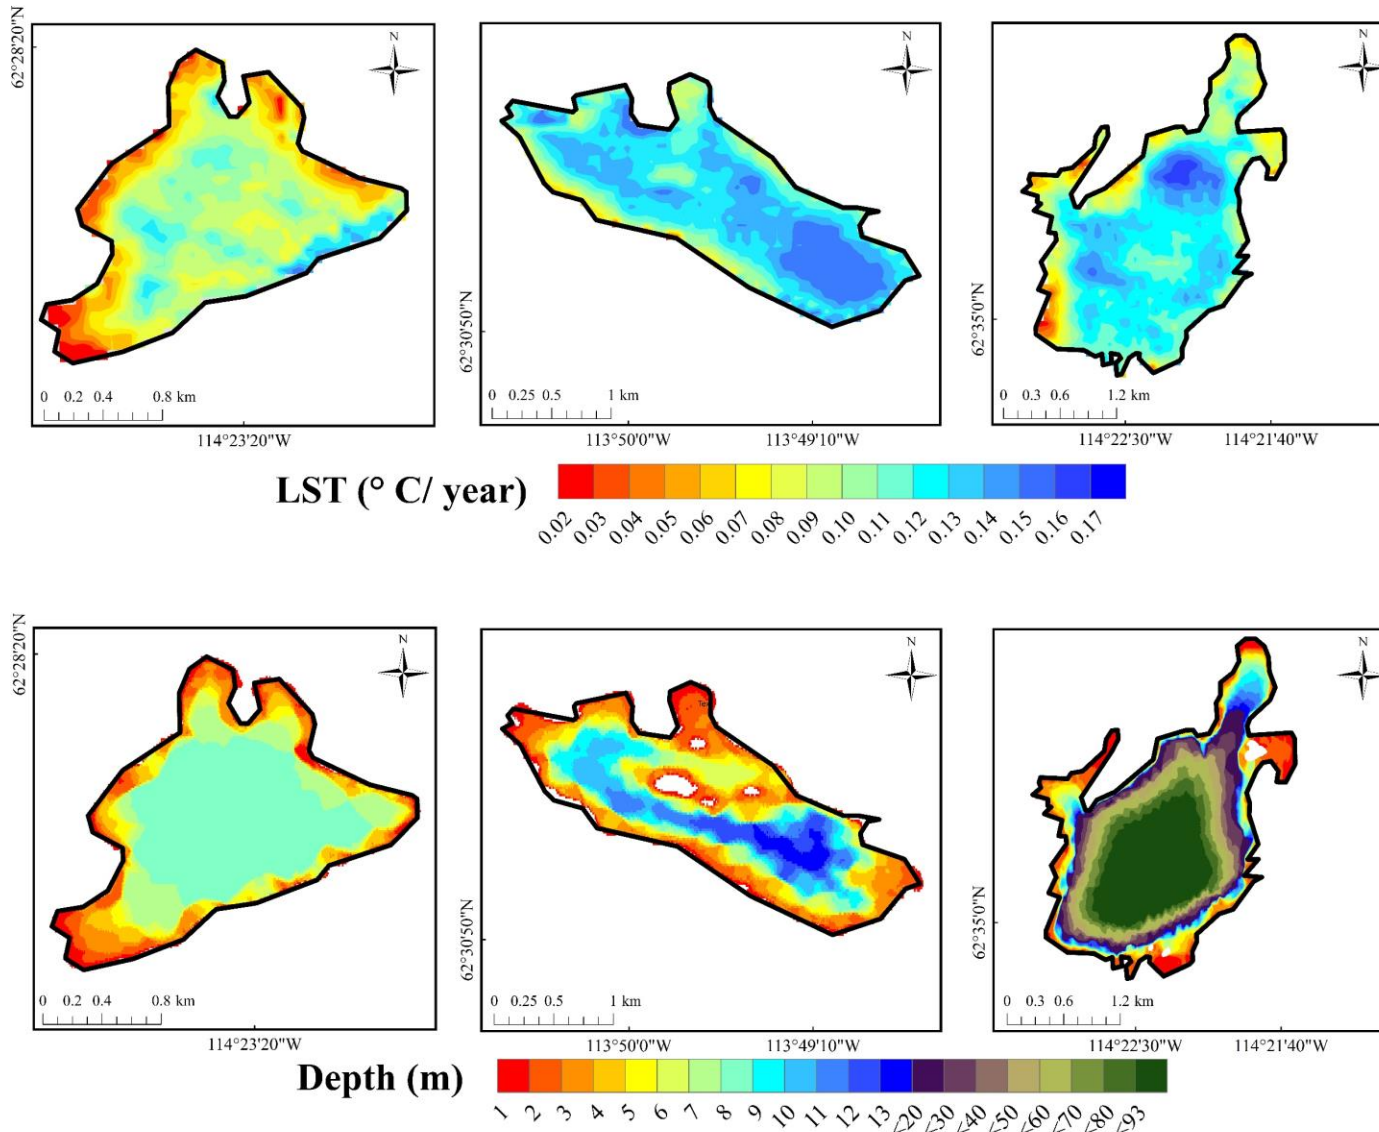

Generate an open-access lake-specific LST dataset

Studying LST trends and spatial variability

# LST Seasonal Trends

# LST Rate of Change

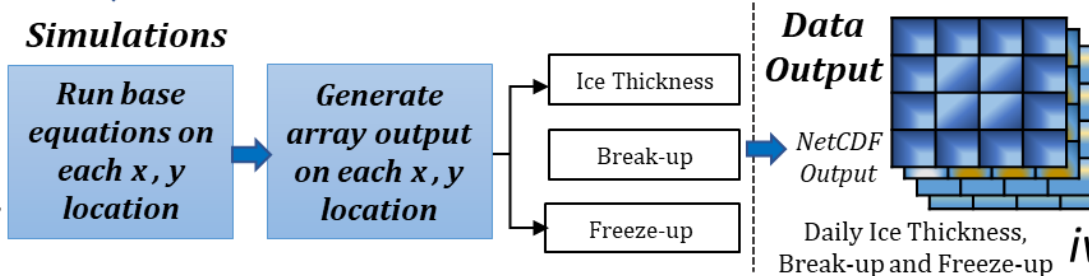

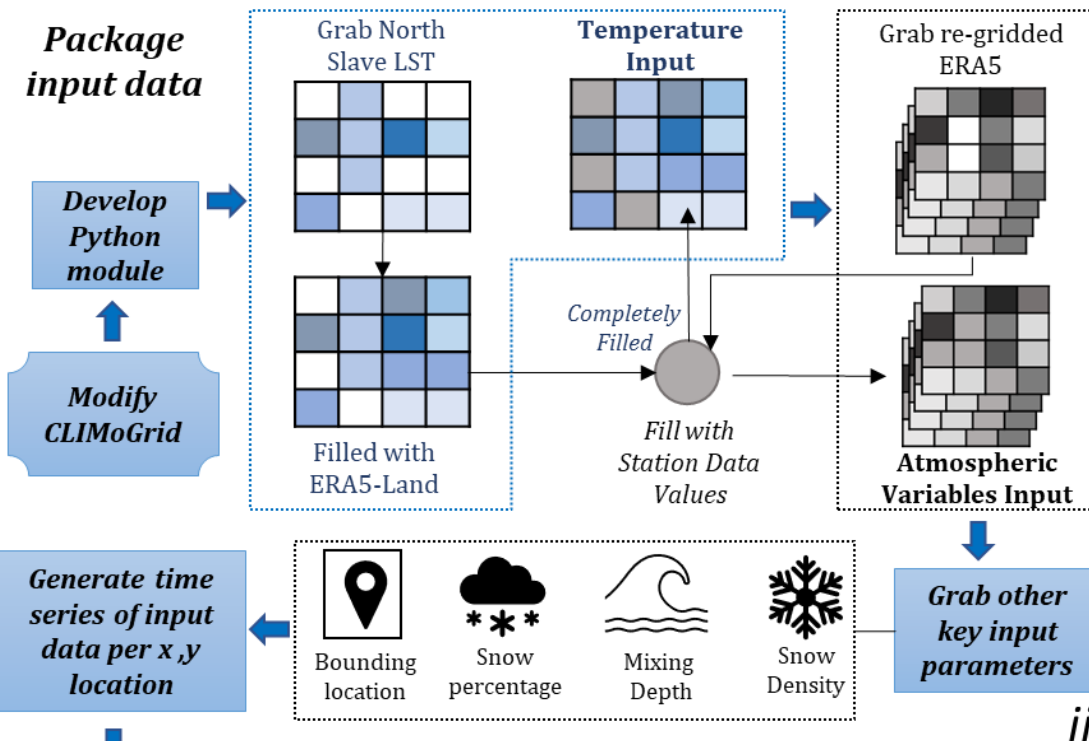

# CLIMoGrid Model

For more details see poster

**Spatially Distributed Modelling of Ice Thickness on Small and Medium Sub-Arctic Lakes**

# Real-time Lake Ice Monitoring

- Great Bear Lake Déhᓄę Ice Road (×2)
- Great Slave Lake, Dettah Ice Road
- Great Slave Lake, Łutsel K'e (×2)
- Vee Lake Ice Road
- Landing Lake, Yellowknife
- Ryan Lake, Yellowknife

8 Snow and Ice Mass  
Balance Apparatuses  
(SIMBA) stations in  
NWT

# Real-time Year-Round Lake Monitoring

# Mapping Lake Snow depth, Ice Thickness & Ice elevation

203.1 203.2 203.3 203.4  
Snow Surface Elevation (masl)

202.79 202.8 202.81 202.82  
Ice Surface Elevation (masl)

30 35 40 45 50 55 60  
Snow Depth (cm)

# CLIMoGrid Model – Mean Yearly Ice Thickness

Great Bear Lake

Great Slave Lake

# CLIMoGrid Model – Daily Ice Thickness

Great Bear Lake

Great Slave Lake

April 01, 2004

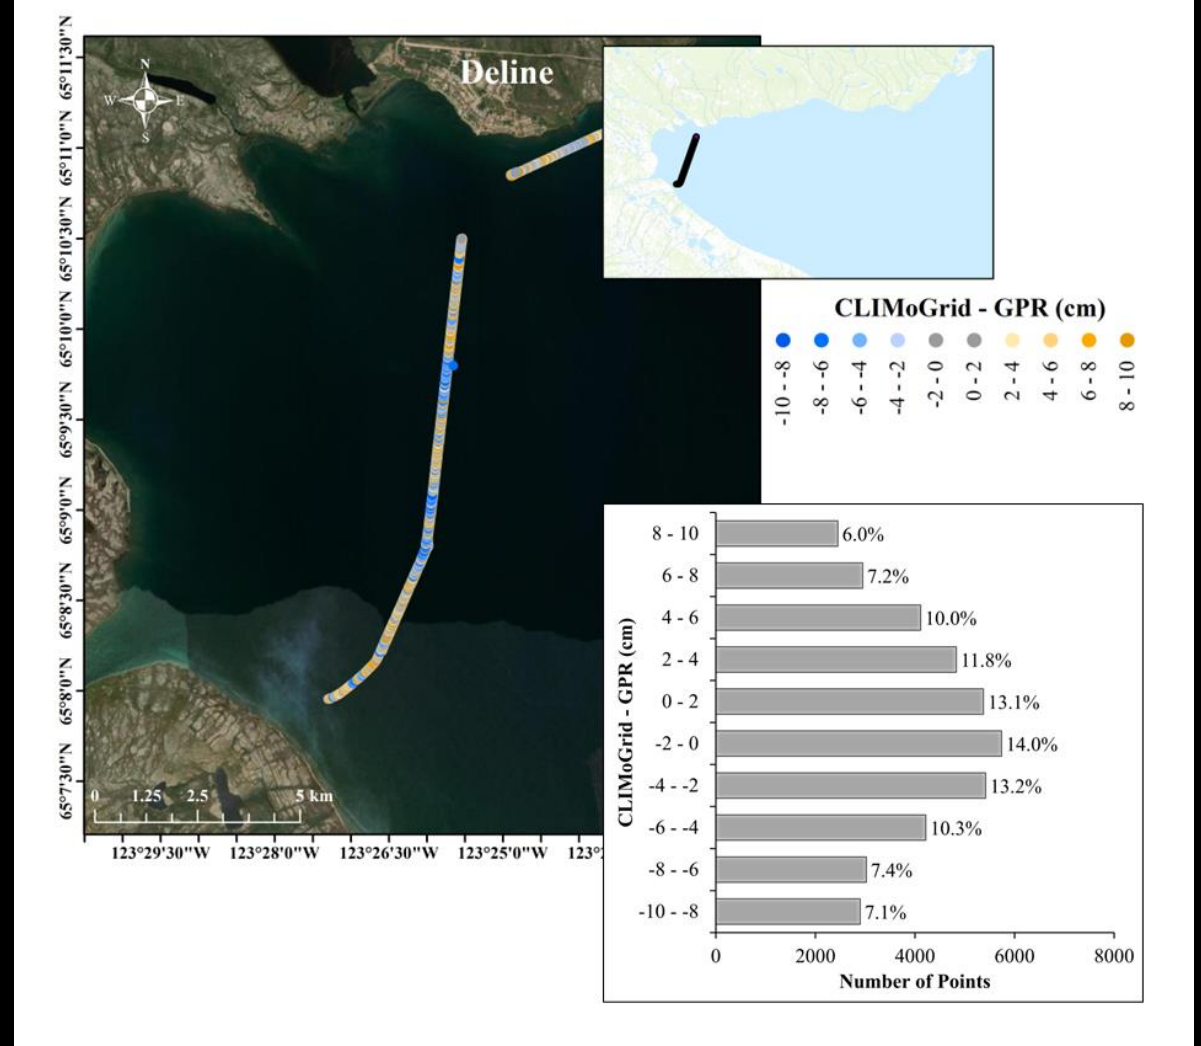

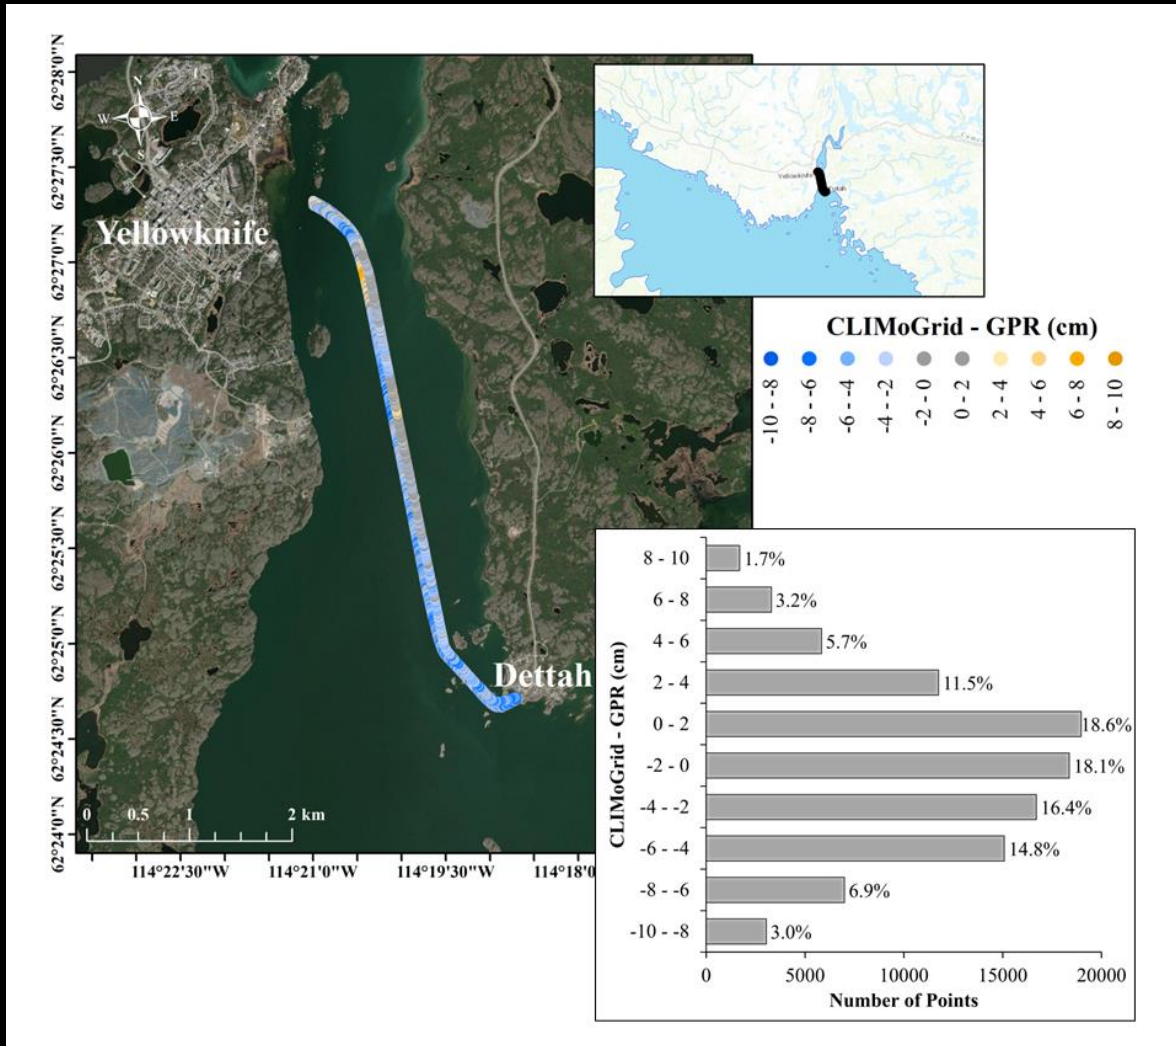

1

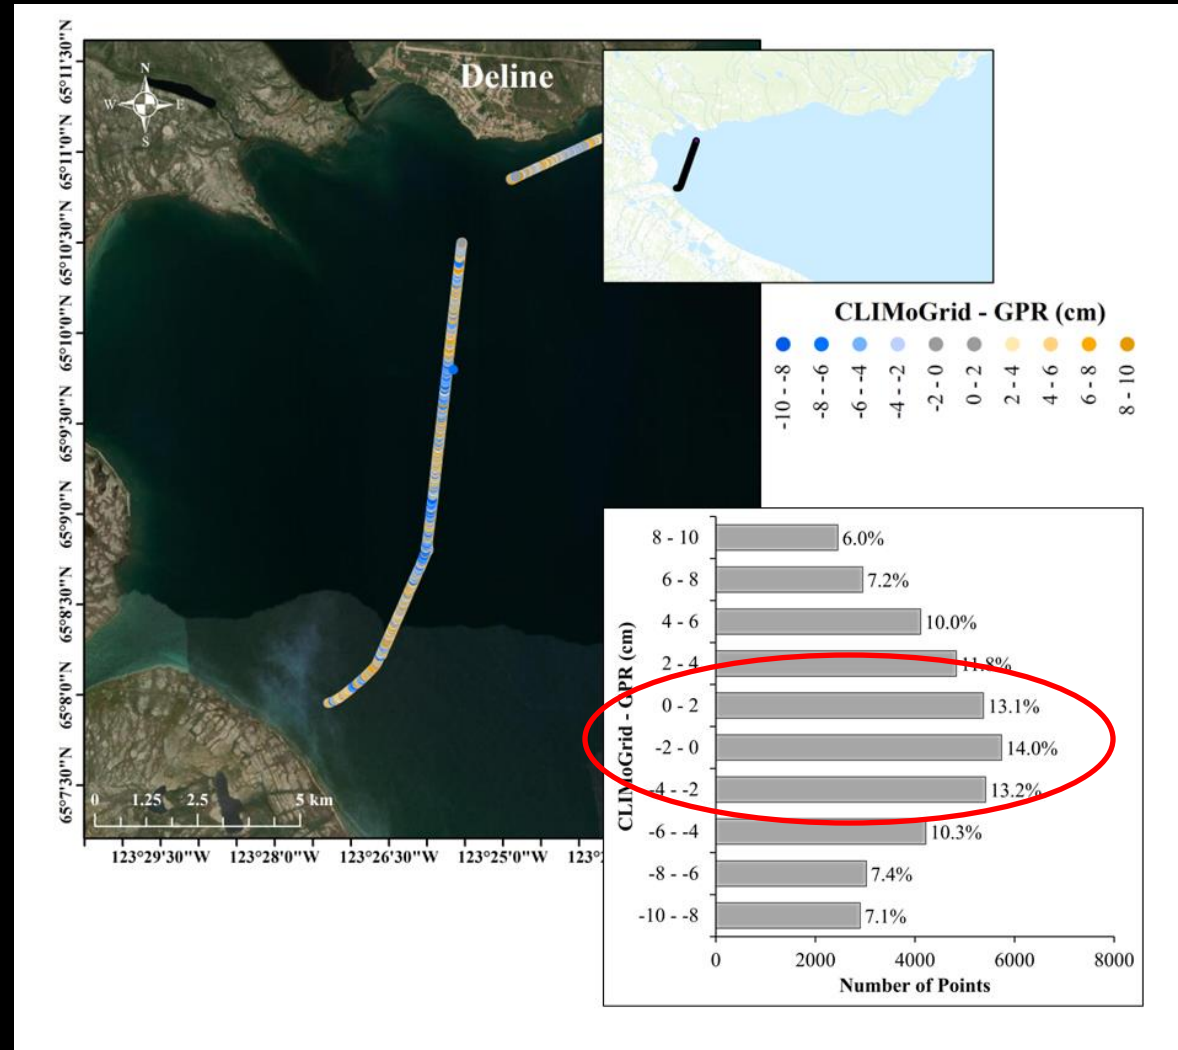

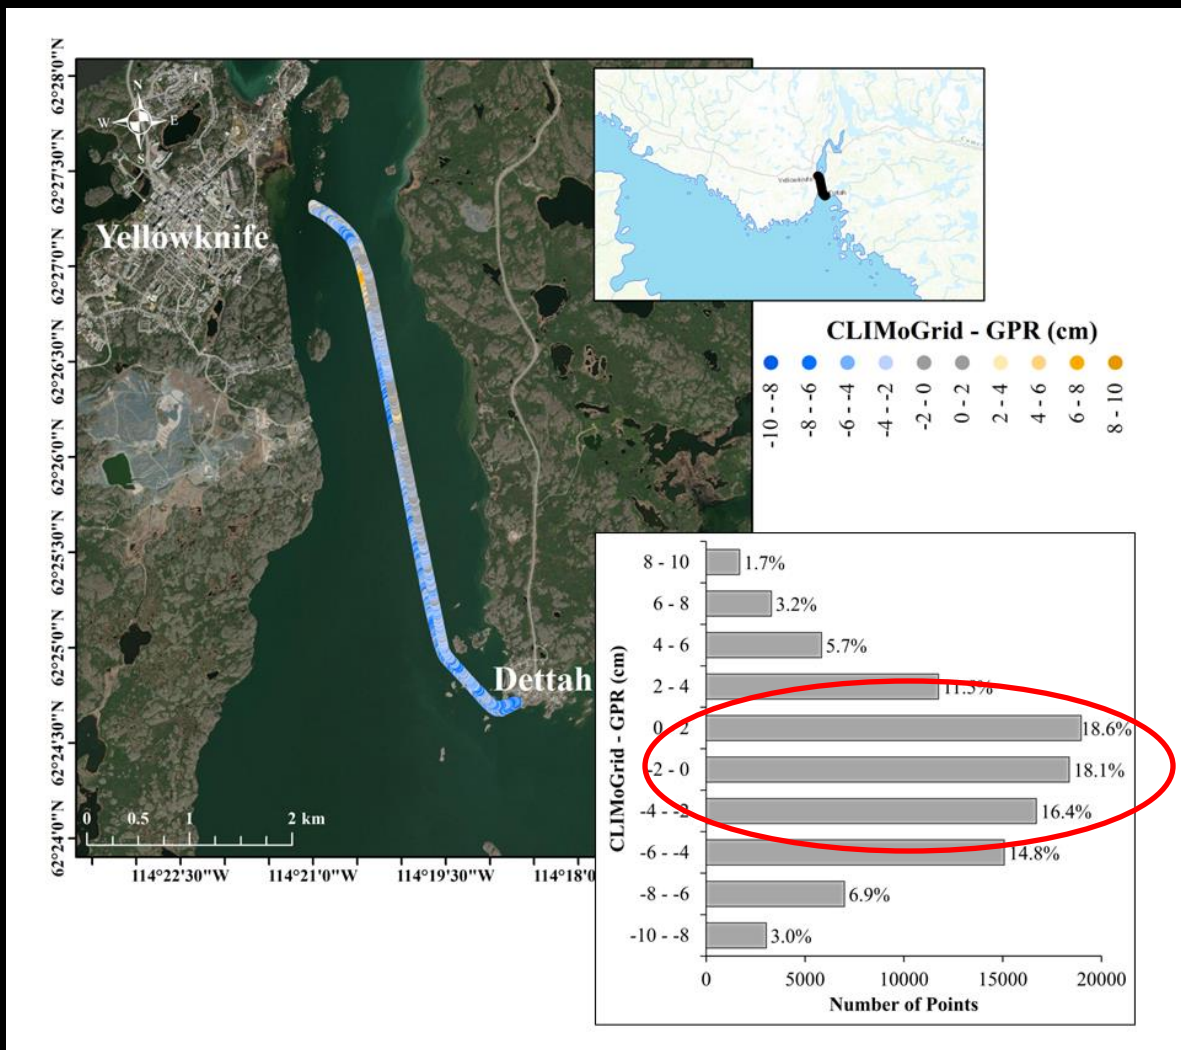

Ice Thickness (m)

1.5

# CLIMoGrid Model – Validation

# CLIMoGrid Model – Validation

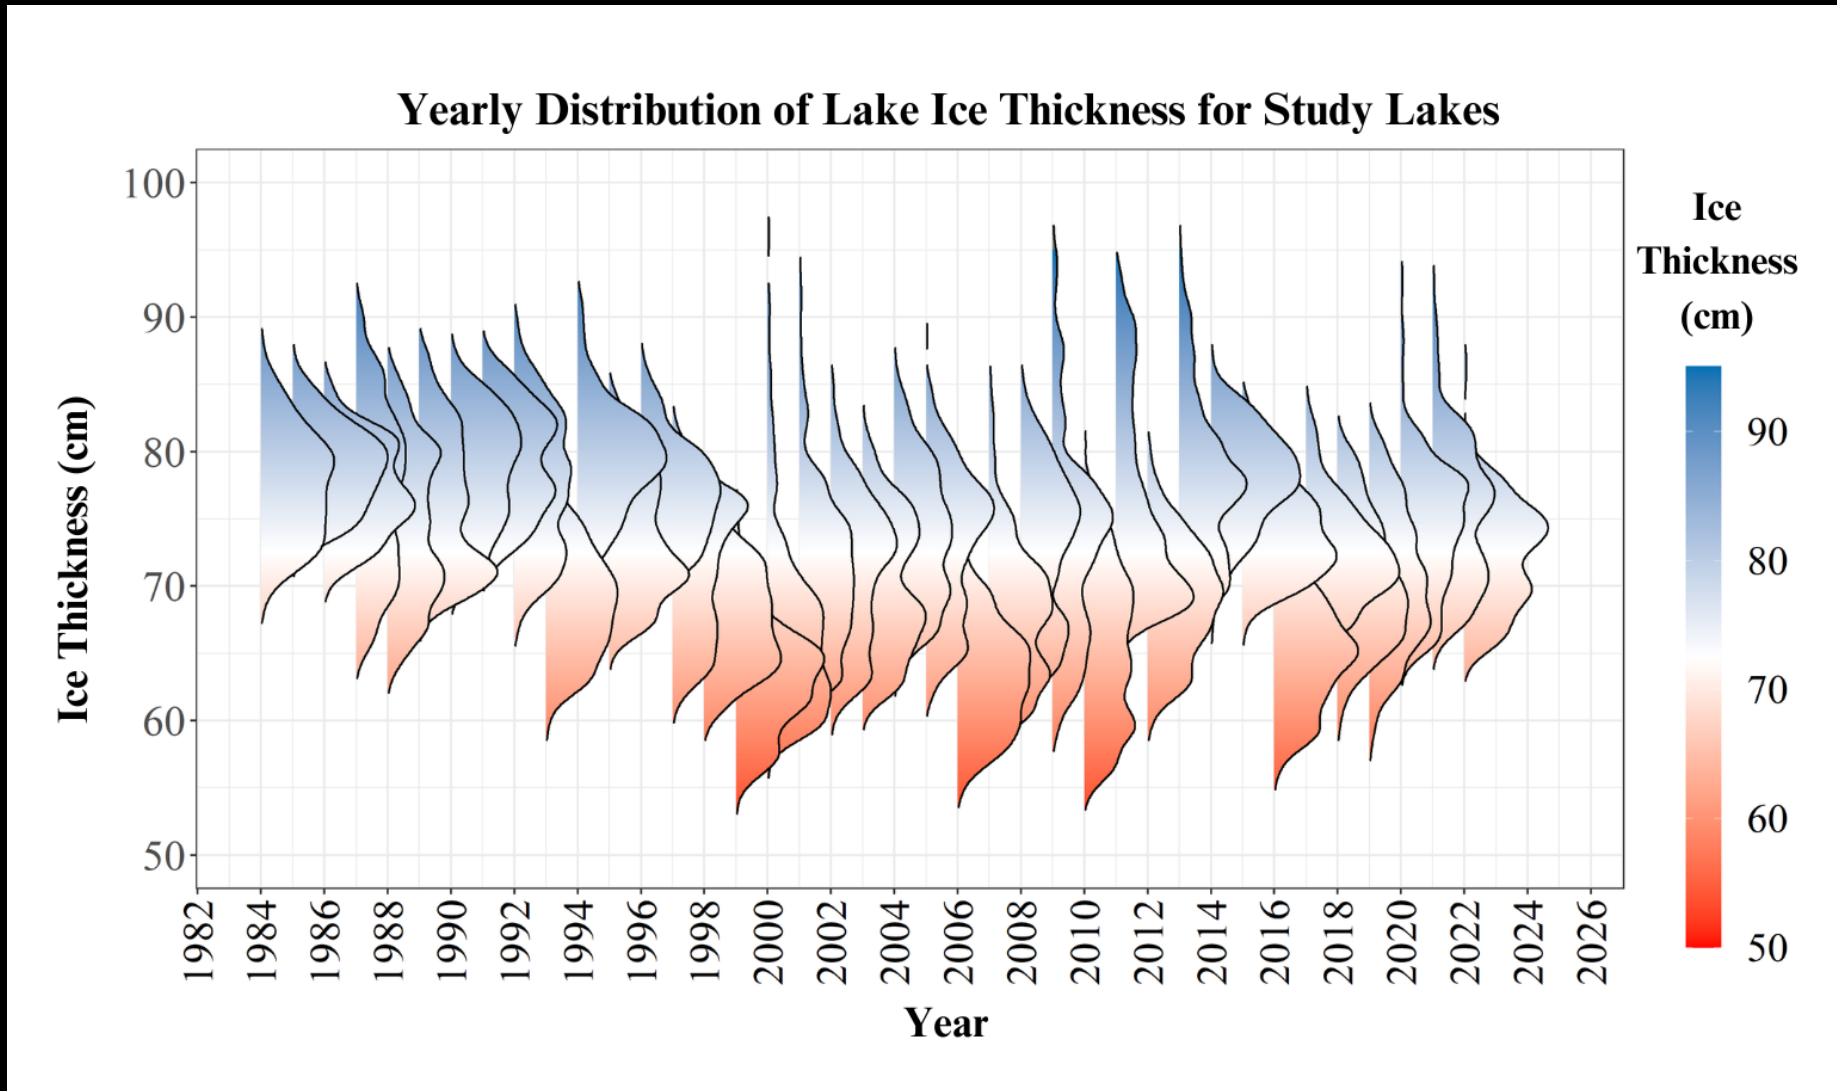

# Validation: Model vs. SIMBA (In Situ)

Comparison of daily simulated lake ice thickness from January to March 2022 with thickness derived from a Snow and Ice Mass Balance Apparatus (SIMBA)

# Yearly Ice Thickness Distribution (1984–2022)

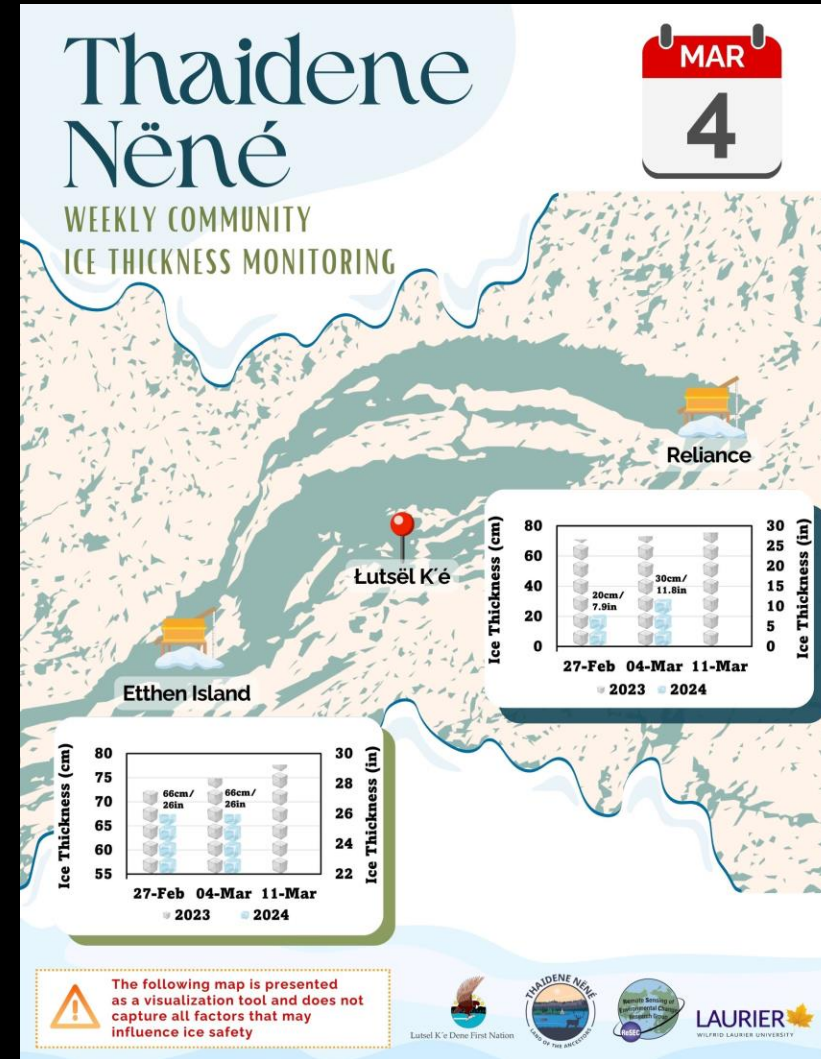

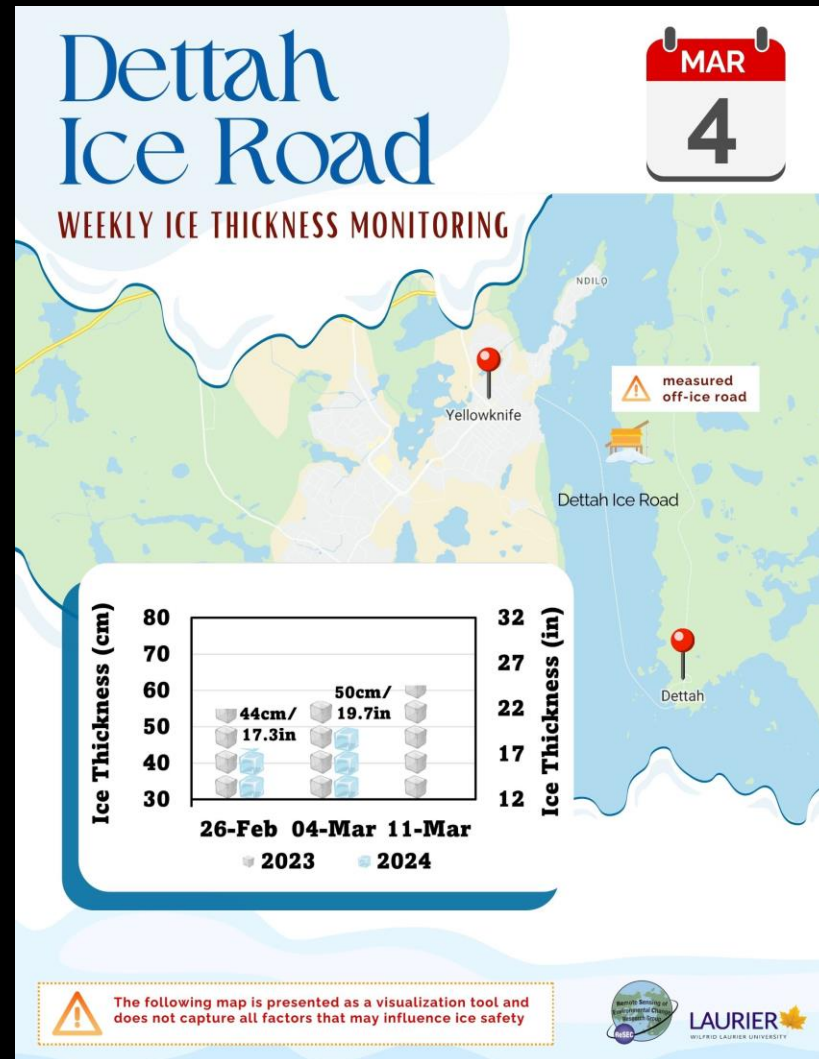

**Significant Decrease in Ice Thickness**

# Lake Ice Thickness Anomaly (1984 – 2022)

**Significant Decrease in Ice Thickness**

# Weekly Community Ice Thickness Monitoring
